PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience across financial services, insurance, business reporting and data quality. Skilled in SQL, Advanced Excel, Power BI and Python for KPI analysis, trend/anomaly detection, automation and actionable business insights.

CORE SKILLS

Analytics & Reporting: SQL (Joins, CTEs, Window Functions), Advanced Excel (Pivot Tables, VLOOKUP, XLOOKUP), Python, Pandas, EDA

Business Intelligence: Power BI, DAX, Power Query, Tableau, KPI Dashboards, Trend Analysis, Data Visualization

Business & Data Analysis: Customer Analytics, Financial & Insurance Analytics, Root Cause Analysis, Data Validation, Process Improvement, UAT

Data & Automation: Azure Data Factory, ETL, Data Cleaning, VBA, Python Automation, Reporting Automation

Collaboration: Stakeholder Communication, Cross-functional Collaboration, Agile, Documentation

PROFESSIONAL EXPERIENCE

Innodata | Remote | Jan 2026 - Apr 2026

Analyst - Data & AI

- Analyzed structured and unstructured datasets using SQL and Python, translating operational trends and exceptions into stakeholder-ready insights.
- Performed QA, consistency and validation checks across 500K+ records, improving data accuracy and supporting reliable downstream reporting.
- Developed 5+ Power BI KPI dashboards and recurring reports to monitor performance, exceptions and data quality.
- Automated repetitive data preparation and reporting workflows using Python, VBA and Advanced Excel, reducing manual effort by 40%.

Accenture | Kolkata, West Bengal | Nov 2023 - Aug 2025

Associate Software Engineer (Data Analytics & Business Reporting)

- Supported financial-services and insurance analytics across 10+ engagements, using SQL and Advanced Excel to extract, analyze and validate portfolio and business data.
- Created and maintained 3+ Power BI dashboards and recurring reporting views to monitor KPIs, portfolio performance, revenue trends and business exceptions.
- Conducted trend, anomaly and root-cause analysis to identify data issues, reporting discrepancies and business bottlenecks; translated findings into actionable recommendations.
- Supported Azure Data Factory ETL workflows and automated SQL/Python reporting activities, improving reporting efficiency and reducing manual effort.

ANALYTICS PROJECTS

Insurance Claims Risk, Data Quality & Process Analytics | Python, Pandas, Data Quality, Risk Analytics | [GitHub](#)

- Analyzed 5,000 synthetic insurance claims to assess data-quality exceptions, settlement performance, rejection patterns and risk indicators; translated findings into business requirements, UAT scenarios and process-improvement recommendations.

Customer Behavior & E-Commerce Analytics | SQL, Python, Power BI | [GitHub](#)

- Analyzed customer demographics, purchasing behavior and sales patterns to identify customer segments, behavioral trends and business opportunities, supported by analytical reporting and visualization.

EDUCATION

B.Tech - Electrical Engineering, Maulana Abul Kalam Azad University of Technology | Aug 2019 - Jul 2023 | CGPA: 8.74/10

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Google Data Analytics Professional Certificate - Coursera
- Deloitte Data Analytics Job Simulation - Forage
