PROFESSIONAL SUMMARY

Data Analytics professional with 2+ years of experience in analytics, business intelligence, reporting automation, data warehousing, and AI-driven analytical workflows across M&A, operational analytics, and enterprise reporting. Skilled in SQL, Python, Power BI, Tableau, ETL pipelines, and cloud-based analytics platforms to analyze large-scale datasets, develop dashboards, automate reporting, and deliver actionable business insights. Experienced in stakeholder management, predictive analytics, statistical analysis, Agile methodologies, and AI/LLM-enabled workflows that support data-driven decision-making.

SKILLS

Programming Languages: Python, SQL (MySQL, PostgreSQL, HackerRank 5★ SQL Badge)

BI and Visualization Tools: Power BI, Tableau, MS Excel (Pivot Tables, VLOOKUP, VBA, Macros)

Data Engineering / ETL: Azure Data Factory, Alteryx, ETL Pipelines, Data Cleaning & Transformation, Data Validation, Data Preprocessing, AI-Assisted Annotation

Analytics & Business Skills: Agile Methodologies, KPI Reporting, Statistical Analysis, Risk Analysis, Stakeholder Management, Business Communication, DAX, EDA, Anomaly Detection, Predictive Analytics

WORK EXPERIENCE

Innodata | Remote

Jan 2026 – April 2026

Analyst - AI/LLM

- Analyzed and validated 500K+ structured and unstructured records using SQL and Python, improving data accuracy by 30%.
- Developed 5+ Power BI dashboards for KPI tracking and business reporting, reducing reporting turnaround time by 25%.
- Automated recurring reporting processes using Python, VBA, and Excel, reducing manual effort by 40%.
- Evaluated and validated AI/LLM outputs across multiple data workflows, improving annotation quality and consistency by 35%.
- Collaborated with global stakeholders to deliver analytical insights that supported data-driven business decisions.

Accenture, Kolkata, West Bengal

Nov 2023 – Aug 2025

Associate Software Engineer

- Supported analytics for 10+ M&A projects by developing SQL-based data extraction and reporting solutions for client teams.
- Built ETL pipelines and analytical datasets using Azure Data Factory, improving data reliability by 25%.
- Developed 3+ Power BI dashboards tracking financial and operational KPIs for senior stakeholders.
- Automated reporting workflows using SQL and Python, reducing manual effort by 40% and accelerating report delivery.
- Applied statistical analysis and anomaly detection techniques to identify reporting risks, reducing data inconsistencies by 20%.

EDUCATION

B.Tech – Techno International New Town, Kolkata, West Bengal

Aug 2019 – Jul 2023

CGPA: 8.74 / 10

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Coursera
- Deloitte Data Analytics Job Simulation – Forage

PROJECTS

Shopping Mall Sales Analytics Dashboard | Power BI, SQL, Excel, Python

- Built an interactive Power BI dashboard analyzing store-wise and category-wise sales performance with KPI-driven visualizations for revenue, profit, customer footfall, and average transaction value.
- Performed SQL and Excel-based data preprocessing, transformation, and validation to create analytical datasets.
- Conducted trend analysis and business performance reporting to identify revenue growth opportunities and operational insights.

Daikibo IoT Telemetry Analytics Dashboard | Tableau, SQL, Excel

- Analyzed large-scale IoT telemetry data from manufacturing equipment to evaluate machine performance and operational efficiency.
- Developed Tableau dashboards highlighting equipment utilization, downtime trends, and operational bottlenecks.
- Supported predictive maintenance initiatives through data analysis and visualization-driven insights.
